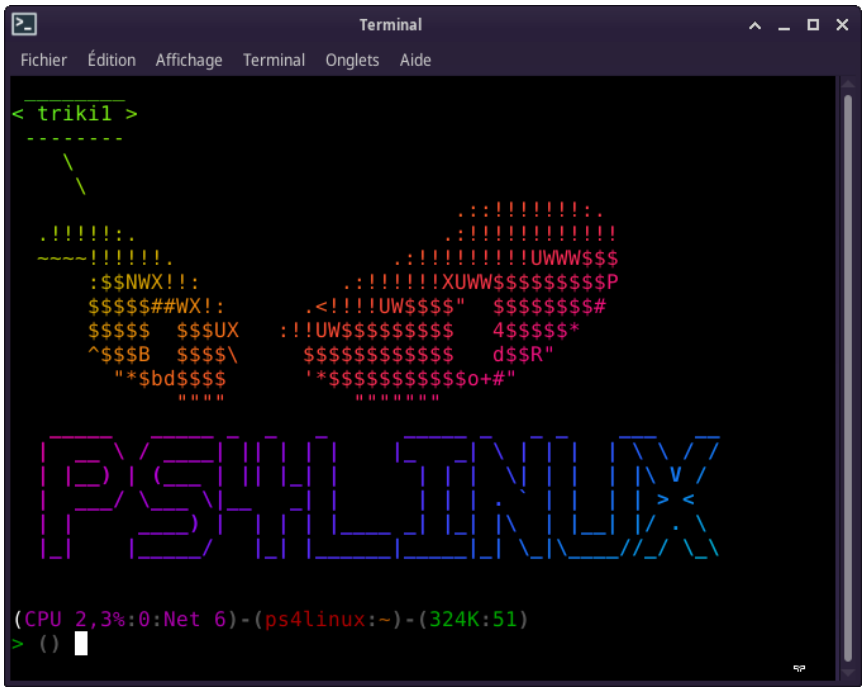
CUSTOM BASH

When you open the terminal, you have a signature. We will see how to customize it.



everything is in /home/ps4linux/.bashrc
Eit it : geany /home/ps4linux/.bashrc
Read it! Everything is commented, aliases have been added, you can add others.
For the signatures everything happens at the bottom of the script.
Line 772 to 781
Line 780 change my name Triki1, by your name.
If you don’t
If you don't like it put a # in front of the line to uncomment it.
For example if you want neowofetch remove the # in front. Line 772

.bashrc - /home/ps4linux - Geany
